Dr. Ham graduated from Kansas State University with a bachelor of science in agronomy in 1984, a master of science in soil physics from Oklahoma State University in 1986, and a Ph.D. from Texas A&M University in environmental physics in 1990. Dr. Ham joined the Department of Soil and Crop Sciences at CSU in August of 2008 with an appointment that includes research, teaching, and extension responsibilities. Prior to joining the faculty at CSU, he led a program in Micrometeorology and Environmental Physics for 18 years at Kansas State University. His research interests include environmental physics and micrometeorology, effects of animal feeding operations on air and water quality, long-term CO$_2$ and H$_2$O flux monitoring by eddy covariance, global climate change and field-scale carbon budgets, instrumentation development, remote sensing, soil-plant-water relations, and irrigation management.

**Speaker:**
Jay Ham
Professor of Environmental Physics
Department of Soil and Crop Sciences

**Location and Time:**
Natural Resources Room 109
April 6, 2015
4:00 - 5:00 pm

**Biography:**

Dr. Ham graduated from Kansas State University with a bachelor of science in agronomy in 1984, a master of science in soil physics from Oklahoma State University in 1986, and a Ph.D. from Texas A&M University in environmental physics in 1990. Dr. Ham joined the Department of Soil and Crop Sciences at CSU in August of 2008 with an appointment that includes research, teaching, and extension responsibilities. Prior to joining the faculty at CSU, he led a program in Micrometeorology and Environmental Physics for 18 years at Kansas State University. His research interests include environmental physics and micrometeorology, effects of animal feeding operations on air and water quality, long-term CO$_2$ and H$_2$O flux monitoring by eddy covariance, global climate change and field-scale carbon budgets, instrumentation development, remote sensing, soil-plant-water relations, and irrigation management.
